Source Name: BIG BOULDER CREEK

Contributory To: COFFEE CREEK

County: Trinity

Year of First Use: 1880

Diversion Within: SW1/4 of NW1/4 Section 04, T37N, R08W, MB&M

Parcel Number:

A. **Water is Used Under:** Riparian claim ☒ Pre-1914 right ☒ Other (explain):

B. **Year of First Use:** (Please provide if missing above) Pre 1880's

C. **Amount of Use:** Enter the amount (or the approximate amount) of water used each month, using the table below.

Amounts below are in: Gallons			Million Gallons (MG)				Acre-feet (AF)				Other		Total Annual
Year	Jan	Feb	Mar	Apr	May	June	July	Aug	Sept	Oct	Nov	Dec	
2003			5	10	10	15	15	15	15	10	5		
2004				10	15	15	15	15	15	10	5		
2005					10	10	15	15	15	15	10		

D. **Purpose of Use** - Specify number of acres irrigated, stock watered, persons served, etc.

Irrigation 5 acres; Stockwatering 5-6; Domestic 6-7 months;

Other (specify):

E. **Changes in Method of Diversion** - Describe any changes in your project since your previous statement was filed.
(New pump, enlarged diversion dam, location of diversion, etc.) None

F. Please answer only those questions below which are applicable to your project.

1. Conservation of water

a. Are you now employing water conservation efforts? YES ☒ NO ☐

Describe any water conservation efforts you have initiated: Sprinklers where possible
unused water returned by ditch to main creek.

b. If you are claiming credit for water conservation under section 1011 of the Water Code for your claimed pre-1914 appropriative right, please show the amount of water conserved:

Reduction in Diversions:

Year _____ (AF/MG) Year _____ (AF/MG) Year _____ (AF/MG)

Reduction in consumptive use:

Year _____ (AF/MG) Year _____ (AF/MG) Year _____ (AF/MG)

I have data to support the above surface water use reductions due to conservation efforts. YES ☐ NO ☐

*EW/RS/BA
7/31/08*

2. Water quality and wastewater reclamation

- a. Are you now or have you been using reclaimed water from a wastewater treatment facility, desalination facility or water polluted by waste a degree, which unreasonably affects such water for other beneficial uses? YES ____ NO X
- b. If you are claiming credit due to the substitution of reclaimed water, desalinated water or polluted water in lieu of a claimed pre-1914 appropriative right under section 1010 of the Water Code, please show amounts of reduced diversions and amounts of substitute water supply used:

Amount of reduced diversion:

Year ____ (AF/MG) Year ____ (AF/MG) Year ____ (AF/MG)

State the type of substitute water supply: None

Amount of substitute water supply used:

Year ____ (AF/MG) Year ____ (AF/MG) Year ____ (AF/MG)

I have data to support the above surface water use reductions due to the use of a substitute water supply. YES ____ NO ____

3. Conjunctive use of surface water and groundwater

- a. Are you now using groundwater in lieu of surface water? YES ____ NO X
- b. If you are claiming credit due to the substitution of groundwater for a claimed pre-1914 appropriative right under section 1011.5 of the Water Code, please show the amounts of groundwater used:

Year ____ (AF/MG) Year ____ (AF/MG) Year ____ (AF/MG)

I have data to support the above surface water use reductions due to the use of groundwater. YES ____ NO ____

I understand that it may be necessary to document the water savings claimed in "F" above if credit under Water Code sections 1010 and 1011 is sought in the future.

I declare that the information in this report is true to the best of my knowledge and belief.

This covers diversions from Boulder Creek and
Pinkham Creek.
All unused water is returned to Coffee Creek.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right in the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, or flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by a riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

Supplement Statement.
E. K. & Louise Mc Donald
P.O. Box 10 Trinity Center, Ca. 94091

Trinity Center, Ca.
March 28, 1991

It is difficult to adapt a standard form to all conditions, so this more detailed note is attached. We have a deeded water right to water from Boulder Creek, and the deeded right to convey it thru the upstream neighbor's watercourse - ditch, flume - etc. (About one half mile, more.) to our property boundary where the diversion is made. We also have riparian right to a seasonal stream, Pinkham Creek, for early use. Numbers appearing on State sheet are - 44-37 N - SW - 441 - (Sheet 7) J W & Viva Mc Donald - Prior 1900 etc.

Since 1987 we have made every effort to conserve water, and all water not in use is returned to Coffee Creek in one stream, about one tenth mile below the mouth of Boulder

Our water uses, in importance are. House holders, two to six persons, including small garden

2 Forest fire protection, laundry, bridge, etc. We have two portable two inch high pressure pump and engine units, which will be on the property in fire season. Fire hose thread fittings.

3 Pasture, three or four Acres. including sub-irrigation. Sprinkler ditches, because of late snow melt will probably not be all cleaned this spring.

A record 14.38 ^{inches} March 1991 rainfall, with very little run off, will make a great difference in stream flow locally. Should be no shortage of water. However, the Forest could be very dry
